

## **Online Alumni Information System**

### **Abstract**

An alumni association is an association of graduates (alumni) Project more broadly, for former students. In the alumni of universities, colleges, schools, fraternities and sororities often form groups with alumni from the same organization.

These associations often organize social events; publish newsletters or magazines raise funds for the organization. Many provide a variety of benefits and services that help alumni maintain connections to their educational institution and fellow graduates.

Additionally, such groups often support new alumni and provide a forum to form new friendships and business relationships with people of similar background.

Alumni associations are mainly organized around universities or departments of universities, but may also be organized among students that studied in a certain country.

In the past, they were often considered to be the universities or schools old boy network. This project is aimed at developing a repository for the alumni of the college, which is of importance to a college.

The Repository and Search Engine (RASE) is an Internet based application that can be accessed throughout the World. Anyone can access the Search Engine to know about any Alumni of that college but can't able to add. Alumni can only update the database when they are in the college.
